EDUCATION

Farmingdale State College

Farmingdale, NY

B.S. in Computer Science, Magna Cum Laude, GPA: 3.83

Aug 2024

Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management, AI and Machine Learning, Operating Systems, Secure Programming

EXPERIENCE

Software Engineer

Oct 2024 - Present

DMW&H

Fairfield, NJ

- Modernized a legacy Visual Basic desktop application by developing a containerized web-based replacement using .NET Core microservices, Docker, and React, improving maintainability and scalability.
- Led deployment of customer sites, configuring SQL Server databases, delivering new full stack features, and resolving integration bugs to ensure a seamless go-live for warehouses processing 15,000+ transactions daily.
- Collaborated with clients on-site to install, test, and troubleshoot the WMS platform, leveraging logging data from MongoDB and SQL insights to improve reliability and streamline warehouse operations.
- Migrated 5+ legacy features into a RESTful API in .NET, and developed corresponding React components for the frontend, improving scalability and enabling modular feature development.

Software Engineer Intern

Feb 2024 – Sep 2024

BeeEnrolled

Remote

- Contributed to full-stack development of an E-learning platform utilizing Vue, Laravel, and MySQL, adhering to the Model-View-Controller (MVC) design pattern best practices.
- Improved social media outreach and by developing dynamically generated Open Graph meta tags, providing a visually appealing and contextually accurate view of each URL.
- Achieved a 20% decrease in average page load time for the instructor dashboard by developing an API that enables conditional rendering of Vue components pertaining to onboarding completion.

PROJECTS

Oyster | TypeScript, React, Remix, Node.js, Redis

Open-source Contributor

- Implemented an administrative feature allowing admins to edit and moderate resource content posted by all users, protecting content quality and accuracy while maintaining user permissions.

AI PDF Analyzer | TypeScript, Next.js, AWS S3, PostgreSQL, Pinecone

Sole Contributor

- Engineered a fullstack webapp focused on users uploading PDF documents to an S3 bucket which are scanned into vector embeddings and interpreted by an OpenAI model for users to chat with about the selected PDF document.
- Applied the Retrieval-Augmented Generation (RAG) technique in machine learning to convert PDF documents into vector embeddings and analyze them using vector similarity for AI-driven interactions.

TECHNICAL SKILLS

Languages: TypeScript, Java, C#, Python, PHP, Kotlin, SQL

Technologies: React, Node.js, .NET, Angular, Vue, Next.js, Laravel

Developer Tools: Git, Unix/Linux, Docker, Kubernetes, Firebase, Postman, Kafka

Testing: JUnit, Swaggar, Jest

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900)
